

LICENSEE WANTED

R & S Designs, Inc. is seeking a Licensee to manufacture and market our line of Easy-Count products. These products are covered by a U.S. Patent. Patents are pending for the Easy-Count line of products for Australia, Canada, and the Euro Group.

The patent covers a kit with instructions to install the **Easy-Count Guideline™** in a cross stitch fabric, an **Easy-Count Fabric™** with the guideline woven into the fabric, and a waste fabric made entirely of nylon line. Other add-on Easy-Count products are being investigated.

As this is the only patented product on the market that keeps one's place on the cross stitch fabric, this line of products is positioned to control the guideline fabric market for the foreseeable future. It is estimated that this will become a multimillion dollar business in the next few years.
